ROLLSTANC MACHINE

The type of 1000-3000 Rollstanc machinefamily is the essential equipment of wrapping technology. The rollstanc machines have been developed mainly for the industry of paperprocess. With the help of this different size and thickness of materials can be cut and rilled with great efficiency. It can be used for: cartons, wavecarton, rilling and cutting of B, C, BC microwave materials, and also for plastic flakes, mouses, PVC, sponges, gumflakes, corksealants, and textiles. The rollstanc machines are served manual. We produce our machines with the most modern electricity and frequency changer, which can allow of slow startings and fast stops. The diecutter machine is a low consumer due to the great producing technology, and punctual and clear work can be done.

Type	HST 1000	HST 1500	HST 2000	HST 2500	HST 3000	HST 3000-B
Tableheight (mm)	885	885	885	885	885	885
Width (mm)	1420	1920	2420	2920	3420	3420
Length (mm)	3600	4400	4400	5300	6300	7300
Workwidth (mm)	980	1480	1980	2460	2960	2960
Worklength (mm)	1300	1800	1800	2500	3200	3700
Motor (Kw)	1,5	2,2	2,2	3	3	5,5
Roll (diameter)	300	300	300	300	300	400
Weight (kg)	1050	1300	1650	2050	2300	2600
Producing speed (meter/sec)	0,7	0,6	0,5	0,45	0,4	0,4
Max. producing products (piece/h)	1250	1100	950	800	750	650
Service (million cuts)	1	1	1	0,5	0,5	0,5
